Cancer Letters, 67 (1992) 217 – 219
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 67

Adenylate cyclase, beta-adrenergic receptor, GTP-binding proteins, lung epithelial cell lines, growth regulation, 139
Adnab-9, monoclonal antibody, inflammatory bowel disease, 61 Aging, 1,2-diethylhydrazine, carcinogenesis, rats, 21
2-Amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine, ^{32}P-postlabeling analysis, DNA adducts, colon carcinogenesis, 117
(+)-*S*-2-Amino-5-iodoacetamidopentanoic acid, (+)-*S*-2-amino-6-iodoacetamidohexanoic acid, lymphosarcoma, toxicity, polyamines, 193
(+)-*S*-2-Amino-6-iodoacetamidohexanoic acid, (+)-*S*-2-amino-5-iodoacetamidopentanoic acid, lymphosarcoma, toxicity, polyamines, 193
3-Aminobenzamide, cisplatin resistance, rat ovarian tumor cell line, DNA damage and repair, 27
Antagonists, experimental therapy, WEHI-3B leukemia, human xenotransplants, colon cancer, lung cancer, Lewis-lung cancer, platelet activating factor, 145
Anti-proliferative signal, interferon-α, tamoxifen, U937 cells, 13
Aphidicolin, neuroblastoma cells, cell killing, 199

Beta-adrenergic receptor, adenylate cyclase, GTP-binding proteins, lung epithelial cell lines, growth regulation, 139
Brain tumours, *N*-ethyl-*N*-nitrourea, rats, nuclear magnetic resonance imaging, magnetic resonance spectroscopy, 125
Breast cancer, placental isoferritin, differentiation, 35
Breast carcinoma, ferritin, cytosol, tumour marker, 103

C-*ets*-1 protooncogene, rat embryo fibroblasts, immortalization, transformation, 71
^{13}C-NMR, luteolin, flavonoids, chalcones, growth inhibition, ^{31}P-NMR, 207
Cancer, T-lymphocytes, pancreas, hamster, pretumoral stages, immunesurveillance, 79
Carcinoembryonic antigen, monoclonal antibody, colonic effluent, 47
Carcinogenesis, 1,2-diethylhydrazine, aging, rats, 21
Carcinogenesis, diethylstilbestrol, mice, prenatal, hypothalamus, 55
Cathepsin D, laryngeal cancer, 133
Cell killing, aphidicolin, neuroblastoma cells, 199
Chalcones, luteolin, flavonoids, growth inhibition, ^{13}C-NMR, ^{31}P-NMR, 207
Characterization, 20-methylcholanthrene transformation, development, murine fibroblast, 1
Cisplatin resistance, rat ovarian tumor cell line, DNA damage and repair, 3-aminobenzamide, 27
Colon cancer, platelet activating factor, antagonists, experimental therapy, WEHI-3B leukemia, human xenotransplants, lung cancer, Lewis-lung carcinoma, 145
Colon carcinogenesis, 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine, ^{32}P-postlabeling analysis, DNA adducts, 117
Colon carcinogenesis, dietary fat, tumor initiation, dimethylhydrazine, 87
Colonic effluent, carcinoembryonic antigen, monoclonal antibody, 47
Cytosol, ferritin, breast carcinoma, tumour marker, 103
Cytotoxicity, malachite green, morphological alterations, free radical formation, hydroxymethyl radicals, Syrian hamster embryo cells, 93

Development, 20-methylcholanthrene transformation, characterization, murine fibroblast, 1
Dietary fat, tumor initiation, colon carcinogenesis, dimethylhydrazine, 87
1,2-Diethylhydrazine, carcinogenesis, aging, rats, 21
Diethylstilbestrol, mice, prenatal, carcinogenesis, hypothalamus, 55
Differentiation, breast cancer, placental isoferritin, 35
Dimethylhydrazine, dietary fat, tumor initiation, colon carcinogenesis, 87
DNA adducts, 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine, ^{32}P-postlabeling analysis, colon carcinogenesis, 117
DNA damage and repair, cisplatin resistance, rat ovarian tumor cell line, 3-aminobenzamide, 27
DNA methylation, X-ray, mouse m5S/1M cell, tumorigenic transformation in vitro, protooncogenes, 157

Epstein-Barr virus, p53 gene mutations, head and neck tumors, nasopharyngeal carcinoma, human papillomavirus, 167
Experimental therapy, platelet activating factor, antagonists, WEHI-3B leukemia, human xenotransplants, colon cancer, lung cancer, Lewis-lung carcinoma, 145

Ferritin, breast carcinoma, cytosol, tumour marker, 103
Flavonoids, luteolin, chalcones, growth inhibition, ^{13}C-NMR, ^{31}P-NMR, 207
Free radical formation, malachite green, cytotoxicity, morphological alterations, hydroxymethyl radicals, Syrian hamster embryo cells, 93

Growth inhibition, luteolin, flavonoids, chalcones, ^{13}C-NMR, ^{31}P-NMR, 207
Growth regulation, adenylate cyclase, beta-adrenergic receptor, GTP-binding proteins, lung epithelial cell lines, 139
GTP-binding proteins, adenylate cyclase, beta-adrenergic receptor, lung epithelial cell lines, growth regulation, 139

Haematoporphyrin derivative, porphyrins, photdynamic therapy, 175
Hamster, T-lymphocytes, cancer, pancreas, pretumoral stages, immunesurveillance, 79
Head and neck tumors, p53 gene mutations, nasopharyngeal carcinoma, Epstein-Barr virus, human papillomavirus, 167
Human papillomavirus, p53 gene mutations, head and neck tumors, nasopharyngeal carcinoma, Epstein-Barr virus, 167
Human xenotransplants, platelet activating factor, antagonists, experimental therapy, WEHI-3B leukemia, colon cancer, lung cancer, Lewis-lung carcinoma, 145
Hydroxymethyl radicals, malachite green, cytotoxicity, morphological alterations, free radical formation, Syrian hamster embryo cells, 93
Hypothalamus, diethylstilbestrol, mice, prenatal, carcinogenesis, 55

Immortalization, c-*ets*-1 protooncogene, rat embryo fibroblasts, transformation, 71
Immunesurveillance, T-lymphocytes, cancer, pancreas, hamster, pretumoral stages, 79
Inflammatory bowel disease, monoclonal antibody, Adnab-9, 61
Interferon-α, tamoxifen, U937 cells, anti-proliferative signal, 13

Laryngeal cancer, Cathepsin D, 133
Lewis-lung carcinoma, platelet activating factor, antagonists, experimental therapy, WEHI-3B leukemia, human xenotransplants, colon cancer, lung cancer, 145
Lung cancer, platelet activating factor, antagonists, experimental therapy, WEHI-3B leukemia, human xenotransplants, colon cancer, Lewis-lung carcinoma, 145
Lung epithelial cell lines, adenylate cyclase, beta-adrenergic receptor, GTP-binding proteins, growth regulation, 139
Luteolin, flavonoids, chalcones, growth inhibition, ^{13}C-NMR, ^{31}P-NMR, 207
Lymphosarcoma, (+)-*S*-2-amino-5-iodoacetamidopentanoic acid, (+)-*S*-2-amino-6-iodoacetamidohexanoic acid, toxicity, polyamines, 193

Magnetic resonance spectroscopy, *N*-ethyl-*N*-nitrourea, brain tumours, rats, nuclear magnetic resonance imaging, 125
Malachite green, cytotoxicity, morphological alterations, free radical formation, hydroxymethyl radicals, Syrian hamster embryo cells, 93
Metastasis, prostate cancer, seminal vesicle, neoplasm, rats, 113
20-Methylcholanthrene transformation, development, characterization, murine fibroblast, 1
Mice, diethylstilbestrol, prenatal, carcinogenesis, hypothalamus, 55
Monoclonal antibody, Adnab-9, inflammatory bowel disease, 61
Monoclonal antibody, carcinoembryonic antigen, colonic effluent, 47
Morphological alterations, malachite green, cytotoxicity, free radical formation, hydroxymethyl radicals, Syrian hamster embryo cells, 93
Mouse m5S/1M cell, X-ray, tumorigenic transformation in vitro, DNA methylation, protooncogenes, 157
Murine fibroblast, 20-methylcholanthrene transformation, development, characterization, 1

N-ethyl-*N*-nitrourea, brain tumours, rats, nuclear magnetic resonance imaging, magnetic resonance spectroscopy, 125
Nasopharyngeal carcinoma, p53 gene mutations, head and neck tumors, Epstein-Barr virus, human papillomavirus, 167
Neoplasm, prostate cancer, seminal vesicle, metastasis, rats, 113
Neuroblastoma cells, aphidicolin, cell killing, 199

Nuclear magnetic resonance imaging, *N*-ethyl-*N*-nitrourea, brain tumours, rats, magnetic resonance spectroscopy, 125

Ornithine decarboxylase, ornithine, perifusion, polyamines, 187
Ornithine, ornithine decarboxylase, perifusion, polyamines, 187

^{31}P-NMR, luteolin, flavonoids, chalcones, growth inhibition, ^{13}C-NMR, 207
P53 gene mutations, head and neck tumors, nasopharyngeal carcinoma, Epstein-Barr virus, human papillomavirus, 167
Pancreas, T-lymphocytes, cancer, hamster, pretumoral stages, immunesurveillance, 79
Perifusion, ornithine, ornithine decarboxylase, polyamines, 187
Photodynamic therapy, porphyrins, haematoporphyrin derivative, 175
Placental isoferritin, breast cancer, differentiation, 35
Platelet activating factor, antagonists, experimental therapy, WEHI-3B leukemia, human xenotransplants, colon cancer, lung cancer, Lewis-lung carcinoma, 145
Polyamines, (+)-*S*-2-amino-5-iodoacetamidopentanoic acid, (+)-*S*-2-amino-6-iodoacetamidohexanoic acid, lymphosarcoma, toxicity, 193
Polyamines, ornithine, ornithine decarboxylase, perifusion, 187
Porphyrins, photodynamic therapy, haematoporphyrin derivative, 175
^{32}P-postlabeling analysis, 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine, DNA adducts, colon carcinogenesis, 117
Prenatal, diethylstilbestrol, mice, carcinogenesis, hypothalamus, 55
Pretumoral stages, T-lymphocytes, cancer, pancreas, hamster, immunesurveillance, 79
Prostate cancer, seminal vesicle, neoplasm, metastasis, rats, 113
Protooncogenes, X-ray, mouse m5S/1M cell, tumorigenic transformation in vitro, DNA methylation, 157

Rat embryo fibroblasts, c-*ets*-1 protooncogene, immortalization, transformation, 71
Rat ovarian tumor cell line, cisplatin resistance, DNA damage and repair, 3-aminobenzamide, 27
Rats, 1,2-diethylhydrazine, carcinogenesis, aging, 21
Rats, *N*-ethyl-*N*-nitrourea, brain tumours, nuclear magnetic resonance imaging, magnetic resonance spectroscopy, 125
Rats, prostate cancer, seminal vesicle, neoplasm, metastasis, 113

Seminal vesicle, prostate cancer, neoplasm, metastasis, rats, 113
Syrian hamster embryo cells, malachite green, cytotoxicity, morphological alterations, free radical formation, hydroxymethyl radicals, 93

T-lymphocytes, cancer, pancreas, hamster, pretumoral stages, immunesurveillance, 79
Tamoxifen, interferon-α, U937 cells, anti-proliferative signal, 13
Toxicity, (+)-*S*-2-amino-5-iodoacetamidopentanoic acid, (+)-*S*-2-amino-6-iodoacetamidohexanoic acid, lymphosarcoma, polyamines, 193
Transformation, c-*ets*-1 protooncogene, rat embryo fibroblasts, immortalization, 71
Tumor initiation, dietary fat, colon carcinogenesis, dimethylhydrazine, 87
Tumorigenic transformation in vitro, X-ray, mouse m5S/1M cell, DNA methylation, protooncogenes, 157
Tumour marker, ferritin, breast carcinoma, cytosol, 103

U937 cells, interferon-α, tamoxifen, anti-proliferative signal, 13

WEHI-3B leukemia, platelet activating factor, antagonists, experimental therapy, human xenotransplants, colon cancer, lung cancer, Lewis-lung carcinoma, 145

X-ray, mouse m5S/1M cell, tumorigenic transformation in vitro, DNA methylation, protooncogenes, 157
